

My Dream House
by Ryan – Year 5

I am going to write a story to tell you all about my dream house.

My dream house would have three floors (not including the loft conversion), the first floor would have four rooms, the second floor would have five rooms, and the third six. My dream house would be detached.

In my dream house there would be three bathrooms, one kitchen, six bedrooms, six en-suites, a games room, two dining rooms and one massive living room.

I would like to have three bathrooms so there would be one on each floor. There would be only one kitchen because I don't do much cooking. Six bedrooms would be good so I could have lots of people round my house and each bedroom will have an en-suite. A games room is essential so that I would have somewhere to chill out. Two dining rooms would be needed, one for me and my Dad to eat in when a football match is on, and another for everybody else! A massive living room would be included so that the whole family could sit down and watch some TV altogether.

In my garden there would be a swimming pool, two tennis courts, a trampoline, a small football pitch and a basketball hoop and two acres of land.

I would have a swimming pool so that on hot days the whole family could have a dip in the pool. There would be two tennis courts because my sister and I like playing tennis. A trampoline would be nice because I've always wanted one, and a small football pitch so my Dad and I could play football. A basketball hoop would be an idea too because I enjoy playing basketball. The two acres of land would be so that I could run around and do some sports. Also on the two acres of land I

could get a shed for my Dad and some space for flowers for my Mum.

The games room would have chargers for all the gadgets, three gaming chairs, a plasma screen TV, a snooker table and a football table. I would have chargers for all the gadgets in the gaming room so that when I am playing on my game I won't lose any battery power. Three gaming chairs would be available so that my friends and me could all play in comfort. A TV would be there so that I could plug my consoles in and play. I would have a football table, a snooker table, a table tennis table and an air hockey table so that if you didn't want to play on a gadget you could play something else and all of these games I really enjoy.

The games room would have black wallpaper and the floor would be very dim. The games room would have black wallpaper and floor to make it dark and the main lights would be very dim. All the games, chairs, table, gadgets and TV would all light up to give the room some light.

The living room would be the second biggest room. It would have comfy leather chairs and only the best cushions. It would have a big TV for watching the football and it would have a Sky+ HD box, ESPN and Sky 3D! It would have white walls and a wood floor.

My bedroom would be the biggest room. It would have red walls and a white carpet. It would also have a king sized bed which would have a built in TV and a big cabinet to hold all my collectables. It would have a beanbag area to relax in, a safe to hold all my valuables, a walk-in wardrobe and shelves to hold my Lego models.

My bedroom would be the biggest because the house would be mine and I like having a big room. It would have a king sized bed for me to sleep in, and only me. It would have a built in TV so that when I wake up I can watch TV in bed. My room would

have a beanbag area to sit down and relax. The most important rooms in my house would be my games room and the living room.

If I could have a games room in my house it would be really nice so that there would be one room just for gaming. I would be so excited and thankful if I could have a gaming room.
